

Planning Land Use Strategies

Meeting **biodiversity**, **climate** and **social** objectives in a changing world

PLUS Change is a Horizon Europe Project with a trans-disciplinary, systems approach to developing new **land use strategies** and **decision making processes**.

Our **12 practice cases** are real world examples of land use decision making in diverse geographic areas across urban, rural, and peri-urban contexts.

Possible Landscapes is the creative outreach programme that runs parallel to the project, using arts and storytelling methodologies to help us imagine a future of sustainable land use.
